FRONT COVER

Lulworth Cove

Lulworth is unique on this planet in having such diversity of landforms in a small area

Lulworth Cove is one of the world's best examples of a cove formed by differential erosion along a concordant coastline, where bands of rock run parallel to the shore.

The area showcases a rare sequence of rock layers—from Portland limestone and Purbeck beds (Jurassic) to Wealden clays, Greensand, and Cretaceous chalk—offering a visible cross-section of over 150 million years of Earth history.

Features like the *Lulworth Crumple* and *Stair Hole* are dramatic displays of tectonic folding and erosion, rarely seen in such close proximity and clarity.

Current and archived results, Gas & Air, averages etc., are also published in PDF format on www.dsrpa.co.uk
